

2D MLG Post-OEF Reinvestment of Forces

8 MAY 2013

Presentation to the Installations and Logistics
Board
2d MLG G-3

Purpose and Agenda

Purpose

- **Discuss the projected change in focus for CONUS and deployed forces in the Post-OEF environment.**

Agenda

- 2d MLG post-OEF operational design
- 2d MLG post-OEF Concept of Employment Graphic
- 2d MLG Opportunities and Challenges.

Brief type: Informational

Post-OEF Operational Design

Current Conditions

What are the Requirements?

- The “New Norm”
- DSCA CONUS crisis response efforts.
- TSC focus in MFE, MFA, and MFS.
- Contingency planning.

- Enduring presence in various regions will likely cause growth in infrastructure, supply, and equipment set to support crisis and TSC events, **2d MLG will have to provide both deployed and reach back sustainment support to sustain II MEF forces.**

- 2d MLG will likely see an increased demand for SME and unit deployments for TSC. **2d MLG’s role to enable these events with both manpower and materiel will grow.**

What are the tasks?

What makes this different?

- Home station missions.
- Source, Equip, Sustain ad-hoc TSC and crisis forces.
- Support established contingencies
- Provide and augment MEU CLB’s.

- Regional expansion in areas that have not had **sustained** Marine presence.

- 2d MLG will be the **tactical CSS** link to MARFORS via regional support mission.

- Flexible and immediate shift

Demand for engagement forward will grow while fiscal resources will decline

UNCLASSIFIED/FOUO additional support.

Post-OEF Concept of Employment

MARFORAF

- SPMAGTF-Crisis Response
- SPMAGTF-Africa (TSC)
- TSC SME and ad-hoc unit support

MARFOREUR

- Black Sea Rotational Force
- Georgia TSC (BOS-I???)

MARSOC:

- General Purpose Force CSS integration with MSOLB??

MARCENT

- Periodic TSC and episodic deployment support as directed.
- R4OG (CY-15??)

MARFORSOUTH

- Enabler support to CD/CNT Missions
- TSC SME and Unit Employment
- HA/DR

NCLAS

Challenges and Opportunities

- Challenges:
 - Funding
 - Ad-hoc non-standard missions requiring task organization that does not map back to a single unit.
 - Determining the right mix of forward support and responsive “call-forward” personnel.
- Opportunities:
 - Shape USMC logistics support infrastructure at enterprise and tactical level.
 - Leverage and operationalize MCPP-N and MPF in MFE, MFA, and MFS.
 - Deployable and responsive employment of GCSS-MC and other LOG AIS.
 - Engage MLG in BPC missions.
 - MARSOC integration with GPF.

Graphics and images are UNCLASSIFIED

= not fully manned

2d Marine Logistics Group:

WHAT DS LOGISTICS CAPABILITY CAN 2D MLG PROVIDE TO MARSOC

MARSOC Logistics Structure

MARSOC does not require DS Logistics Capability from 2nd MLG

- MARSOC Total Force growth plan will meet known unit requirements.
- Current shortfalls are for individual billets, not unit capabilities.
- 180 CSS Billet shortfall spread across 10 HQs (Battalion to MARSOC-level)
- USSOCOM funds 101 CLS personnel to free uniformed personnel to deploy
- T/O growth synchronized with MILCON plan

MARSOC Shortfalls:

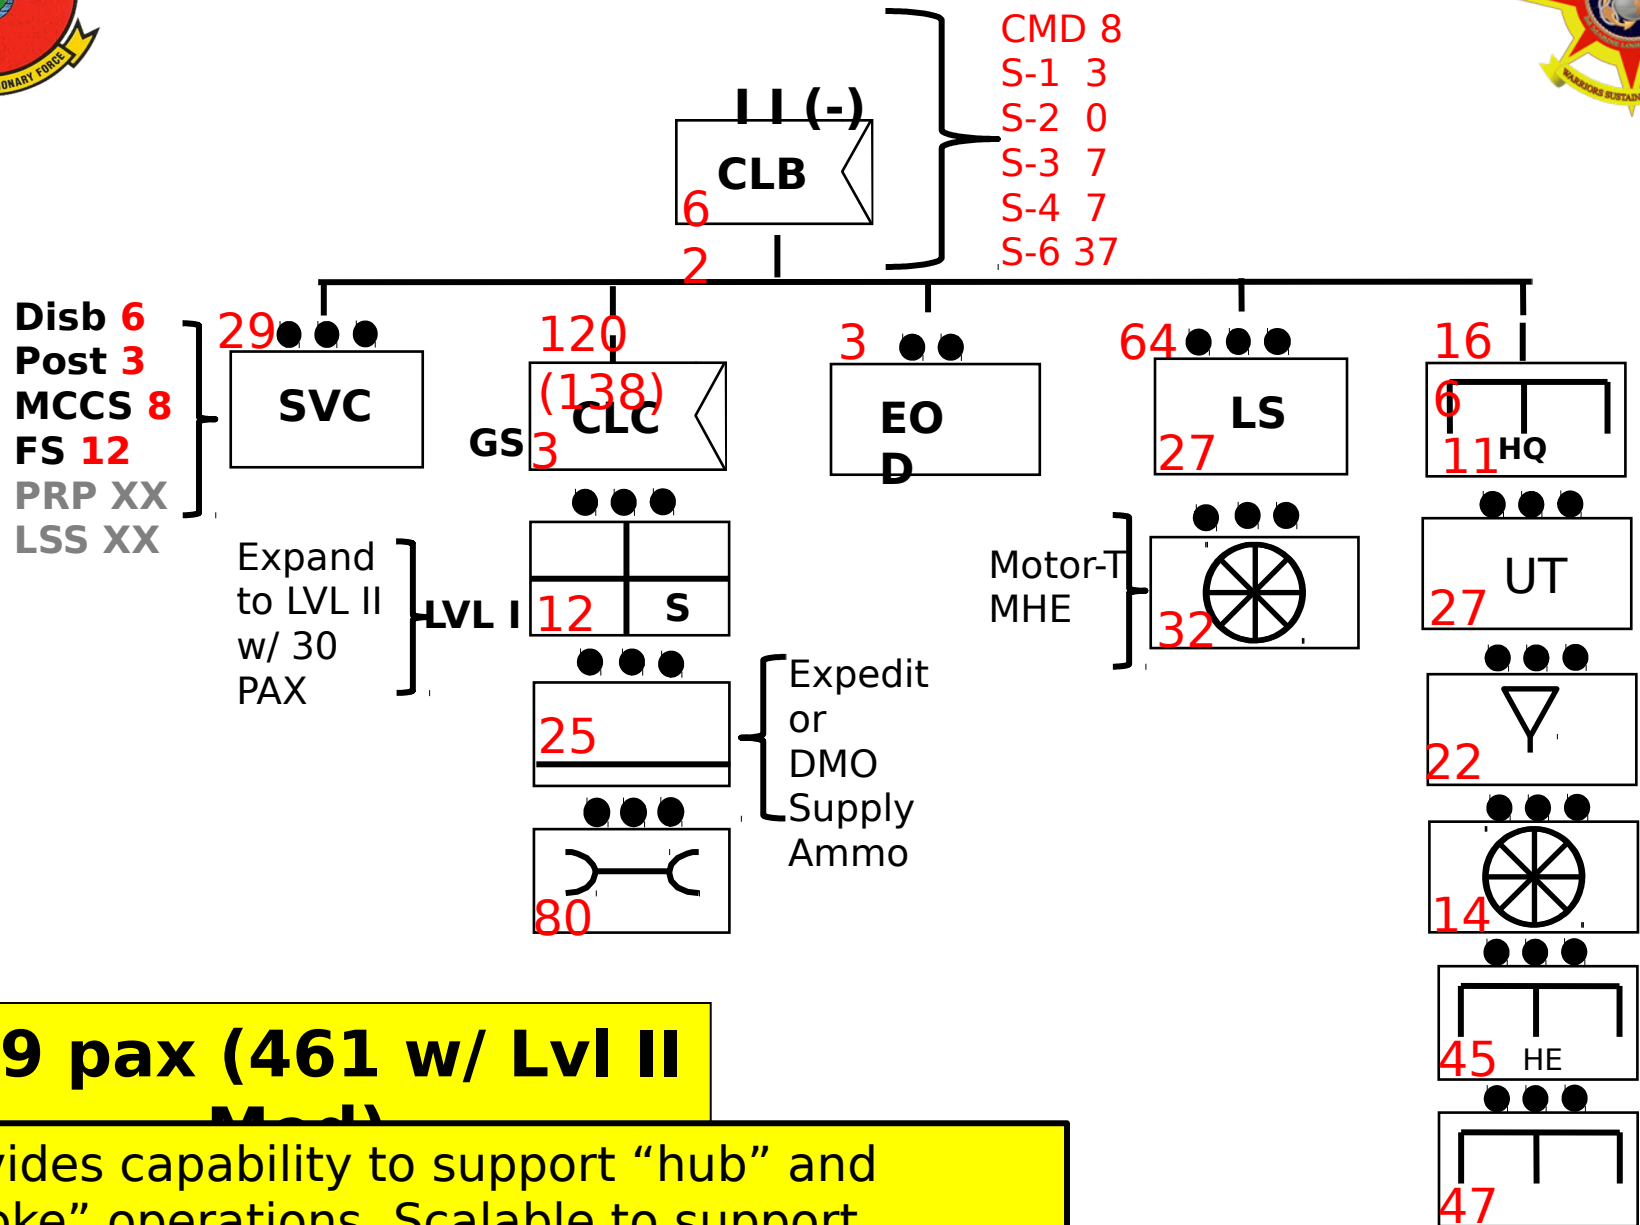

- Staff Support to fill current T/O delta
 - High-Demand/Low density rank and MOSs
 - MARSOC took from staff billets to fill holes in its tactical structure: Tactical CSS on track for FY16 FOC
- Logistics Inspection Support
 - Need SME support and depth to enhance their Logistics Readiness Evaluation Program
- 88 PAX RFF approved at PP&O for next SOTF deployment
 - 44 CSS billets
 - Camp Pendleton based HQs

2^d MLG / II MEF Support:

- 2^d MLG currently provides:
 - Overflow Maintenance support from CLR-25 (standing agreement)
 - Transportation and MHE support through MLG UMCC
- 2d MLG continues to engage directly with MARSOC to continuously reassess their CSS requirements and maintain support.

CR Task Organization

439 pax (461 w/ Lvl II)

Provides capability to support “hub” and “spoke” operations. Scalable to support requirements.
